

Multi-Leg Concealed Solutions

Valmont Larson offers a full line of marquis towers, bell towers, and clock towers as an option for multi-leg camouflage designs. As with most of our concealment structures, the ability to adapt is part of what we do best. Jurisdictional design challenges can be met with simple and reliable tower structures for multi-leg based products. Our RF-friendly materials are tested in a laboratory and in the field.

- All products custom designed and built.
- We offer two different types of panel systems for our towers.
 - Cost effective lightweight panel system for flat applications for our towers
 - Structurally integrated custom molded panels for more complex applications (includes V-Rib horizontal and vertical stiffeners) that can be easily assembled
- Tower designs can range from a simple industrial look to detailed architectural wood to fit into any rural, suburban, or urban environment.
- Accommodates multiple carriers with no equipment visible.

Types of Concealment

- MARQUIS TOWER
- BELL TOWER
- CLOCK TOWER
- WRAPPED TOWER
- SILO TOWER
